Stress Management Techniques

Academic Focus — Group Activity

Divided into 4 Persons • Each person has a specific role

Person 1	Person 2	Person 3	Person 4
Brainstorming	Categorizing	Avoidable vs. Managed	Quick Fix vs. Long-Term

Person 1

Brainstorming Ideas

Generate as many stress management techniques as possible

1. **Make a study schedule & stick to it**
   Plan your week every Sunday evening
2. **Break big tasks into small steps**
   Don't try to study everything at once
3. **Use the Pomodoro Technique**
   25 min study + 5 min break, repeat 4 times
4. **Ask teachers or classmates for help**
   Don't struggle alone — reach out early
5. **Study in groups or pairs**
   Sharing ideas and explaining helps retention
6. **Listen to calm music while studying**
   Helps focus and reduces anxiety levels

Person 2

Categorizing

Sort all ideas from Person 1 into clear categories

A

Academic

Time management, planning ahead, revision techniques

E

Emotional

Journaling, talking to someone, positive self-talk

P

Physical

Exercise, deep breathing, sleep routines, nutrition

S

Social

Study groups, family support, peer discussions

M

Mental / Personal

Meditation, hobbies, mindfulness, digital detox

Person 3

Avoidable vs. Manageable

Decide what can be stopped entirely — and what can only be reduced

Avoidable Stressors

CAN AVOID

Procrastination

Can be stopped by planning ahead

CAN AVOID

Forgetting deadlines

Use a calendar or reminder app

CAN AVOID

Studying in a noisy place

Choose a quiet study space in advance

Only Manageable

MANAGE

Exam pressure

Can't be removed — but can be handled

MANAGE

Fear of failure or bad grades

Work on mindset and preparation

MANAGE

Heavy academic workload

Manage by prioritizing tasks wisely

Person 4

Quick Fixes vs. Long-Term Solutions

Label how lasting each stress management technique is

Quick Fixes

QUICK FIX

Deep breathing (4-7-8 technique)

Calms the body in under 2 minutes

QUICK FIX

Take a short walk outside

Clears the mind quickly and boosts mood

QUICK FIX

Listen to music or watch something funny

Fast mood boost and distraction

Long-Term Solutions

LONG-TERM

Build a consistent study routine

Reduces last-minute panic over time

LONG-TERM

Improve sleep habits (7-8 hours)

Better focus, memory, and mood daily

LONG-TERM

Practice mindfulness or meditation daily

Builds long-term mental resilience

All 4 Together — Prepare to Share

Each person presents their part in 1–2 minutes, then the group gives one final summary.

1

Person 1 — Brainstorming

Present your list of techniques. Aim for at least 8–10 ideas and explain each one briefly.

2

Person 2 — Categorizing

Show the categories and explain why you grouped techniques together. Use examples.

3

Person 3 — Avoidable vs. Manageable

Explain which stressors we can stop vs. only manage — with a real academic example for each.

4

Person 4 — Quick Fix vs. Long-Term

Show the two types and explain why long-term habits matter more for lasting stress relief.
